Tamás **Cservenák**

Software Developer · Build Solutions

About me

Visionary inventor and theoretical physicist, renowned for pioneering work in time travel, flux capacitor technology, and unconventional scientific research. Adept at creative problem-solving, interdisciplinary collaboration, and pushing the boundaries of known science.

Interests

- GNU/Linux
- P2P
- AI
- DeLorean Restoration
- Science Education

Education

2002 **BSc in Computer Science**
SZTE, Faculty of Science, Institute of Mathematics, Department for Computer Science, Szeged, Hungary.
Thesis: *"Oracle recipes"* (RDBMS).

1998 **Computer Science (dropout)**
University of Novi Sad, Faculty of Science, Institute of Mathematics, Department for Computer Science and Numerical Mathematics, Novi Sad, Serbia.
Dissertation: *"Theoretical Approaches to Temporal Displacement and Causality"*.

Professional Experience

2016 – 2026 **Senior Developer**
WalmartLabs (since 2020. Walmart IT) — USA (WFH)
- Designed, built, and operated a binary repository solution serving whole Walmart worldwide for all required formats.
- Solution handled over **8 billion requests per month** (300k+ req/min), managed **1.6 PiB of binary artifacts**, and **maintained 99.99% uptime**.

2007 – 2016 **Developer**
Sonatype Inc. — USA & Europe (WFH)
- Founder, original author of Proximity, an open source project that served as basis for Sonatype Nexus 1 and 2.
- Lead development of Sonatype Nexus 1 and Nexus 2 repository managers.
- Implemented Pro features of Nexus, such as Staging and Promotion.

2000 – 2007 **Developer**
ISmicro LLC — Szeged, Hungary
- Backend developer on complex system for field data acquisition, using Oracle DB, PL/SQL and Java.

Open Source Experience and Contributions

2025 **ASF Member**
ASF
- Elected to full member of Apache Software Foundation.

2024 **Eclipse Sisu Project Lead**
Eclipse Foundation
- Invited as Eclipse Sisu project lead.
- Eclipse Sisu is a JSR330 dependency injection container (DI) that builds upon Google Guice and adds a layer of dynamism and improvements. Sisu DI is among others, used in ASF Maven.

2023 **Started Maveniverse**
Maveniverse
- Founded Maveniverse with goal to "provide the missing pieces from ASF Maven universe".
- Serves as "skunk works" for Maven related development, quick prototyping of Maven related solutions.
- Maveniverse delivers solutions used by projects like JBang, Quarkus and many others are.

2015 **ASF Maven PMC Member**
ASF Maven project
- Elected to PMC member of project.

Experimental Design

2005 **ASF Maven Contributor**

ASF Maven

- Implemented and announced on Maven mailing list the first real Maven Repository Manager. While I solved my own issues – slow DSL in office – it later became the recommedned solution and “best practice” from small to large software forges.

Talks

2014 **Life and Death of ASF Maven**

Hungarian Oracle Users Group — Siófok, Hungary

Showcasing new developments happening in ASF Maven.

2011 **Smart Repository Management**

OpenBlend Slovenia — Ljubljana, Slovenia

Presentation about ASF Maven and remote repositories and their management.
